

EARTH LIVE LOOP

Enhance electric fence intrusion detection capability with Nemtek Earth Live Loops. Designed to help identify attempts to separate or tamper with fence conductors, these security components support improved system responsiveness in vulnerable sections of the fence line. By reinforcing wire monitoring functionality, they contribute to maintaining reliable perimeter protection across a wide range of electric fencing applications.

Features:

- Installed onto the fence wire, generally on the live wires
- Easy to retrofit onto an existing electric fence

Specifications:

Material Hardened steel
Finish Heavy galvanised
